

JIT Toyota-Lift

JAMESTOWN INDUSTRIAL TRUCKS

Send your in-house trainer to a one-day course that will teach and/or refresh them on what is required to be OSHA compliant for forklift operator training. If your company does not yet have a trainer, this would be a great opportunity to select an individual who could take on that role. Everything they need to know to get started will be available at the course.

**This 8-hour program is intended to give trainers the information and tools necessary to form a company-specific forklift operator training course. It utilizes our S.A.F.E.-Lift training program as well as practical demonstrations as a means of ensuring all aspects of the revised OSHA standards are covered.**

# Train-the-Trainer Course Information
